Abstract (en)  
A household press has a pivotally mounted heated plate (14) which cooperates with an ironing table (10). An endless conveyor belt (30) supported on spaced parallel rollers (32, 34) is provided in the ironing table (10). Drive means (39, 40) are also provided to drive the conveyor belt (30) in either of its longitudinal directions. When the heated plate (14) is closed onto the ironing table (10) the conveyor belt (30) is driven whereby an article to be pressed is moved between the heated plate and the ironing table. This enables a large article such as a sheet to be ironed quickly and conveniently. An electrical three-position reversing unit for reversing the direction of rotation of the drive motor (39) is activatable by a lever (46).

Abstract (fr)  
Presse à repasser comprenant une table de repassage et une plaque chauffante de pressage portée par un bras rigide monté pivotant autour d'un axe horizontal entre une position relevée et une position abaissée. Selon la demande, la table de repassage (10) comporte une bande convoyeuse sans fin (30) montée sur deux rouleaux parallèles espacés dont les axes sont disposés perpendiculairement à l'axe de pivotement du bras (16) et dont l'un est entraîné par un groupe moteur. Le sujet de la demande s'applique aux presses à usage ménager.
