Abstract (en)
[origin: US4314938A] The invention relates to iminoisoindolinone pigments of the formula <IMAGE> wherein X is halogen, Y and Z are halogen, C1-C4 alkoxy, or aryloxy, R1 and R2 are hydrogen, halogen, C1-C2 alkyl or C1-C2 alkoxy, and A is phenyl which can be substituted by halogen, trifluoromethyl, C1-C2 alkyl, C1-C2 alkoxy, or by a group of the formula -CONHR3 or -NHCOR4, wherein R3 is hydrogen, C1-C2 alkyl, or phenyl which can be substituted by halogen, methyl, methoxy or trifluoromethyl, and R4 is phenyl which can be substituted by halogen, methyl or methoxy, or is C1-C2 alkyl, or A is a heterocyclic radical. These pigments are distinguished by particularly excellent color strength and fastness to migration and are suitable for pigmenting organic material of high molecular weight.
