Abstract (en)
1. A sealing frame (A) from an extruded profiled section (1) having an anchor foot (6) which is disposed in a corresponding reception groove (4), wherein the sealing frame (A) only one point of junction (7) of the profiled section (1), characterized in that the profiled section (1) essentially has the cross-sectional form of an upright C which projects from the anchor foot (6), the opening of the C being directed towards the centre of the frame, where the only point of junction (7) is arranged between two corners of the sealing frame (A) and where the radius of the deflection of the profiled section (1) at the corners of the sealing frame (A) corresponds to the bending radius of the profiled section.

Abstract (de)
Dichtungsrahmen aus einem extrudierten Profil (1), das einen Ankerfuß (6) zur Aufnahme in einer entsprechenden Rahmennut (4) aufweist. Das Profil (1) besitzt im Dichtungsbereich einen C-förmigen Querschnitt, wobei die Öffnung des Querschnitts an der Innenseite des Rahmens angeordnet ist. Der Dichtungsrahmen ist aus einem einzigen derartigen Profil (1) aufgebaut.
