Abstract (en)
[origin: WO8100272A1] The prefabricated element for roofing comprises a concrete plate (1, 1', 1'') and steel beams with a T-shaped cross-section (2, 2', 2''), the web of the T is provided with teeth of which the ends are embedded in the concrete plate, passages to (d) remaining free between the embedded teeth. Steel beams (2, 2', 2'') extend only on a portion of the concrete plate (1, 1', 1'') so as to provide at the extremities of said plate a free area for the support thereof of for the passage (4) of installation elements.
