Abstract (en)  
[origin: EP0023147A1] A cooling bed for metal stock, which also turns the stock as it progresses along the bank, has sets of carrier (1) and pick-up racks (7). Each set of racks is reciprocated both horizontally and vertically and an adjustment means is provided for adjusting the horizontal stroke of one set of racks. The adjustment means includes a shaft (15), an inner member (43) eccentrically secured to the shaft (15), an outer member (45) eccentrically secured to the inner member (43) and means for connecting the members (43, 45) together at selected relative angular positions.
