Abstract (en)
A carrycase (1) for use with an infant comprise a rectangular box-like case having a hinged lid (6), the lid with the adjacent side (15) being adapted to be pulled downwardly into the plane of the base (2) to provide a working pad on which an infant can be placed for changing or other attention. Supplementary wall elements (9) are provided which can be attached to surround the exposed portion of the pad and complete the walling thereof to provide a carry-cot (10).
