Abstract (en)  
[origin: EP0023711A1] 1. A furniture-type furnishing article, in which at least one outer wall is formed by a frame and at least one wall part held therein, the latter being held along its edge at the inner periphery of the frame at the periphery of the frame struts which are in particular tubular, the edge of the wall part having a recess and the wall part embracing along its edge a partial area of the frame struts essentially in a form-locking manner, characterized in that the wall part (22; 80; 104) is composed of at least two plate members (24, 26; 32, 34; 40, 42, 44, 48, 50, 52; 54, 56; 62, 64, 66; 76, 78; 76, 86, 78; 108, 110), which are disposed adjacent each other and are formed differently, and in that the edge regions, facing one another, of the plate members, rigidly connected to one another, form between themselves a recess (e.g. 58).
