Abstract (en)
[origin: EP0023998A1] 1. Electronic ignition device for internal-combustion engines, wherein the primary (3) of the ignition coil is connected to the amplifier circuit (1) controlled by the mechanical contact breaker (2), characterized in that circuit means (4 to 8) are provided which cause a direct voltage dependent on engine speed to be applied between the primary (3) of the ignition coil and the positive terminal of the power supply.
