Abstract (en)
[origin: EP0024712A1] 1. An output device of a copier for piling up plastic copying films in a receiving tray, comprising a ventilator (25), a transmission corona (24) and a first discharge element (2) in the interior of the copier, characterised in that a fan (20) is installed at the outside of the copier (1) above an output gap (17) whereby the air flow from the fan (20) presses the backside of a plastic copying film (16) coming out of the output gap (17) against a second discharge element (18).
