Abstract (en)

A means for releasably fastening a scrubbing device, such as an abrasive pad, onto a bottle, used to contain a cleaning composition, is disclosed. The bottle includes, on one of its outer surfaces, a fastening device having a multiplicity of outwardly projecting flexible resilient hooks. A scrubbing device having a looped, open, random nonwoven structure is easily attached to the bottle by pressing it against the fastening device; the scrubbing device is removed from the bottle by a slight pull and is ready for use.
