Abstract (en)
A scaffolding joint for connecting together a pair of scaffolding members (1) and (2) has a lug (4) on one member for co-operation with a bracket (5) on the other, and a wedge (6) arranged to retain the bracket (5) and lug (4) tightly in engagement. The wedge (6) has guide surfaces (23) arranged to cooperate with surfaces (25) on the bracket (5) to guide the wedge (6) to a retracted position and retention surfaces (24) arranged to co-operate with corresponding surfaces (26) on the bracket (5) to retain the wedge (6) in that position.
