Abstract (en)
[origin: EP0025410A1] 1. Railborn electric motor vehicle, wherein an electric traction motor (3) lying parallel with the drive axle (2), drives the latter in that the drive axle is connected to the greater wheel of a gear by means of an elastic coupling, a Cardan hollow shaft (7) surrounding the latter and a further elastic coupling, the pinion of which greater wheel is driven by the rotor shaft directly or by means of a further gear, where the traction motor is arranged like a pendulum in the carriage body via connecting rods (9), characterised in that a levelling arrangement (15) is accommodated at the connecting rods (9).
