Abstract (en)

A process for contacting a moving fibrous web with a powder. The process comprises the steps of: I. passing a mixture of powder and air through the moving fibrous web; II. reversing the direction of movement of the fibrous web; and then III. passing a mixture of powder and air through the moving fibrous web in a direction opposite to that of step I. An apparatus (12) comprising an air-tight enclosure (60); means (66) for maintaining subatmospheric pressure within the enclosure; means (70, 72, 73) for passing a fibrous web (31) through the enclosure; and means (114, 112, 86, 86 min) within the enclosure for passing a mixture of powder and air through the moving fibrous web.
