Abstract (en)

[origin: EP0025754A1] 1. A method of encouraging the return of a rolling vehicle, such as a supermarket trolley, to a reception area which comprises an access control means, the method consisting in carrying out several checks on the identity of the vehicle when it passes through the access control means, and after checking issuing a reward, for example in the form of a ticket, characterised in that the access control means comprising at least one gate (14, 114) located at the entrance of the reception area, a first check of the identity of the vehicle (C, 110) is carried out upstream of the gate, then a second check of the identity of the vehicle as it passes through the gate (14, 114) while allowing the vehicle (C, 110) to be withdrawn during this passage, the gate (14, 114) is allowed to return to its closing condition after the passage, and the issue of a ticket is only ordered if the second check confirms the first check and the vehicle (C, 110) has not been withdrawn during the passage through the gate (14, 114).
