Abstract (en)

The uninsulated drain wire (11) of a shielded electrical cable (9) is connected to an insulation displacement terminal (2) of a multi-terminal connector, the terminal (2) being identical to those used for insulated conductors (10) of the cable (9), with the drain wire (11) being received in the conductor-connection slot (5) of the terminal (2) and being wedged in the associated strain-relief slot (7) of the terminal (2) by means of a plug (13) of resilient material.
