Abstract (en)

[origin: EP0027754A2] Heat exchange unit comprising a compressor, a condenser, a pressure reducer, an evaporator and an anti-shock bottle. The unit comprises a collector tank (3) mounted between the condenser (2) and the pressure reducer (4), and a pipe (7) mounted between the high point of the collector tank (3) and the outlet of the evaporator (5) and carrying a so-called defrosting valve (8). In its application the unit is in the form of a heat pump or refrigerating machine. <IMAGE>
