Abstract (en)  
[origin: WO8002753A1] The electronic clock has a digital display of the hours (3) and a separate digital display for the alarm time (4). Both displays (3, 4) may be set by means of two separate rotary buttons (6, 7) or by means of a common rotary button. For setting the time and the alarm time there are provided different cadences allowing the time setting forward or backward. Application to electronic alarm clocks with digital display.
