Abstract (en)

[origin: ES8201499A1] The fork-lift truck comprises two elements independent of each other, each element comprising a vertical mast integral with a horizontal side frame provided with wheels and integral with two parallel cross pieces disposed at different heights, the parallel cross pieces of one element being designed to slide inside the corresponding cross pieces of the other element thus allowing the adaptation of the width of the truck to the load to be taken up. On the vertical mast of each element can slide a support for a lifting arm integral with cross pieces, the corresponding cross pieces of the supports of the two truck elements being also designed to slide the one into the other.

Abstract (fr)

Le chariot est constitué de deux éléments indépendants comprenant chacun un mât vertical 1, 1' solidaire d'un longeron horizontal 2, 2' doté de roues 4, 10 et portant deux traverses 5, 7, 6, 8. Les traverses 5, 7 de l'un des éléments sont destinées à coulisser à l'intérieur des traverses 6, 8 de l'autre élément pour adapter la largeur du chariot au format de la charge. Sur chaque mât 1, 1' coulisse un support 29 pour un bras de levage 28 et chaque support porte deux traverses parallèles 30, 32, 31, 33, les traverses coulissantes 30, 32 de l'un des supports étant conçues pour coulisser à l'intérieur des traverses coulissantes 31, 33 portées par l'autre support.
