Abstract (en)
[origin: EP0029403A1] 1. Espagnolette lock for a door, French window or the like, provided with a control mechanism constituted, on the one hand, of a door-knob hole (4) for the actuating, in the unbolting position, of at least a control rod (7) sliding in a parallel direction to the head (8) of the espagnolette lock (1) and bearing bolting means and, on the other hand, of a transversal bolt (13) for blocking the rod (7) in the bolting position, characterized in that the transversal bolt (13) comprises an inclined plane (20), disposed in a divergent condition with regard to the action direction (21) of the transversal bolt (13) and cooperating with the rod (7) to displace it from the unbolting position (28), or from a position intermediate between the unbolting position (28) and the bolting position (29), to the bolting position (29).
