Abstract (en)

[origin: EP0070577A1] 1. An espagnolette lock for a door, window or the like, comprising a top-plate (8) integral with the opening leaf, at least a working rod (4) provided with bolting means (5, 6, 7) co-operating with some striking-plates integral with the frame, a door-knob hole-piece (21) acting upon the working rod (4), said door-knob hole-piece being returned into the resting position after operating of said working rod, this working rod (4) undergoing a return into a bolting position by means of a resilient element (32) and being immobilizable in an unbolting position by means of a hooking device (42), characterized in that the resilient element (32) is submitted to a prestress by means of a regulating device (34 to 41) comprising a regulating element (39) co-operating with an aperture (41) made in the top-plate (8) and being accessible from the front face (55) of the head (8).
