Abstract (en)

[origin: EP0030495A2] The invention relates to the rig of single-masted light skiffs on which is threaded, with the aid of an attached sleeve, a triangular sail whose peak is connected to the end of a boom or of a wishbone. According to the invention, the sleeve (11) has a perimeter which is larger than that of the mast (13), and it is stretched by a filling lining (14) of synthetic foam. Such a rig is particularly suitable for a wind-surfing board. <IMAGE>
