Abstract (en)

[origin: EP0031613A1] 1. A method of producing an embossed engraving on an endless metal belt connected by a weld seam and used for the surface treatment of compressed laminates, characterised in that the endless belt (3) is electroplated with a metal coating (10) before it is provided with an etched engraving (11), the thickness of the metal coating being greater than the depth of the etched engraving.
