Abstract (en)
[origin: EP0031944A1] 1. An electric switch having a pivotable operating member (1) which acts on a contact rocker (2) by means of a sliding element (3) which is held in a receiver (5) of a switch lever (6) under the pressure of a spring (4), characterised in that the switch lever (6) has a lateral window (8) with the width of the spring (4) towards the receiver (5) ; and that, at the level of or below the window (8), there is provided a support (9) for a moulded body (10) formed on the sliding element (3).
