Abstract (en)
[origin: WO8100202A1] An akupressure implement designed in a tong like manner as a lightweight portable unit which is mountable in a self carrying manner on a relevant limb portion to force an akupressure knob (28) against any selected limb point with a moderate pressure. The akupressure knob (28) is covered by a metallic foil (30) whereby the akupressure treatment is supplemented by an important "foil treatment" effect, this effect in itself being improved by way of the foil (30) being forced against the sensitive limb point.

Abstract (fr)
Un instrument d'acuponcture est concu sous forme de pince legere portative, pouvant se monter de maniere autoportante sur la portion d'un membre pour forcer un bouton d'acuponcture (28) contre un point quelconque d'un membre selectionne avec une pression moderee. Le bouton d'acuponcture (28) est couvert d'une feuille metallique (30) qui permet de completer l'acuponcture par un effet important "de traitement feuille", cet effet etant lui-meme ameliore par le fait que la feuille (30) est forcee contre le point sensible du membre.
