Abstract (en)

[origin: EP0032778A2] 1. A method of manufacturing a heat-insulating and watertight covering layer on concrete roofs, galleries, balconies and terraces, having polystyrene rigid-foam slabs embedded in a casting compound and a covering of concrete or stone slabs, characterized in that a first layer (3) of pressed polystyrene foam slabs embedded in latex cement mortar (2) is laid on the concrete, a second layer (6) of polystyrene foam slabs is laid in the same way on the first layer (3), the vertical joints (4, 7) between the polystyrene foam slabs are also filled with latex cement mortar, the concrete slabs or tiles (9) of ceramic material are embedded in latex cement mortar (8) on the upper layer (6) of polystyrene foam slabs to cover them, and the joints (10) between the slabs or tiles (9) are filled with latex cement mortar.
