Abstract (en)
A bed mattress comprising an outer cover enclosing a resilient anatomical-body-supporting structure (10) having a lower resilient supporting body 11 and a flexible resilient comfort layer (12), the outer cover consisting of top and bottom quilted layer (18, 19) interconnected by a side strip (20) of stretch fabric. The layer (12) is anchored to the body (11) along each transverse end thereof by means of respective adhesive strips (29) whereby inserts, such as inserts (13), can be introduced by a user of the mattress at desired locations between the body (11) and layer (12) to modify the geometry of the mattress to suit his or her comfort and for the relief of any spinal disorders and/or pain.
