Abstract (en)

Roller blind holder for wall, ceiling, bottom, niche or wall fitting mounting consisting of box-shaped holder parts made of plastic material in which the blind rod spindle and knob ends, respectively, rest. By means of different mounting holes (3, 3a, 6, 9) the roller blind holder can be screwed by means of the holes which are most suitably situated for the occasion in question. The spindle end of the blind rod is inserted in one of two cross-shaped holes in one of the holders while the knob end of the rod is inserted into corresponding slots in the second holder (1a). Locking is effected by means of a locking plug (12) which is fixed in an intermediate bottom (10) in the holder part (1a) by means of stops (23) in its shanks (22).
