Abstract (en)
[origin: EP0033004A2] An electronic controller for providing one or more sequences of control outputs for a plurality of controlled devices including a pulser which produces pulses at the rate of the frequency of an ac source, a divider for producing spaced pulses preferably at one-second intervals, a counter for counting a large number of these spaced pulses and one or more PROM's for selecting and actuating one or more sequences stored therein and producing controlling outputs on a plurality of lines to a plurality of controlled devices.
