Abstract (en)  
[origin: EP0033126A2] Fire barrier with a slide-like shut-off element (10) in front of a passage opening (2) through which rails (4) of a transport installation pass. The shut-off element (10) can be moved vertically and, on its narrow side, adjoining the passage opening (2), bears rail sections (16) which are in alignment with the rails (4) of the transport installation in the open position of the passage opening (Fig. 1). <IMAGE>
