Abstract (en)

[origin: EP0033535A2] A link chain (43) for selling aids for storing and putting on display suspended cloths (41, 42), especially home textiles, is formed from sliding hangers (44) which are connected to one another in an articulated manner and which have upper transverse webs (45), which are arranged in tracks constructed in the manner of curtain rails, and longitudinal webs (46) which are connected to said transverse webs and project downwards from the tracks, it being possible for the cloths (41, 42) to be attached to the longitudinal webs (46). In order to be able to produce such a link chain (43) in a more simple manner and to guarantee a more precise guiding, adjacent sliding hangers (44, 44') are integrally connected to one another in each case by means of film hinges (48). <IMAGE>
