Abstract (en)

The invention relates to a boot comprising in combination : an outer body (11) which extends, for an only relatively short distance, above the heel of the wearer, and an inner shoe portion (12) with a leg portion extending for a long section outside said outer body, which leg portion is removably bindable to the free upper edge of the outer body by a flap which surmounts it and which is secured to it by releasable locking means, the rear part of said leg portion also incorporating an insert (15) - which is relatively yieldable elastically - of anatomical shape substantially corresponding to the shape of the heel and ankle of the wearer.
