Abstract (en)
[origin: EP0033921A2] In a built-in baking and roasting oven (8) for built-in kitchen fittings with cabinet-type construction units (1, 1'), which are arranged directly adjacent to one another, said construction units are covered by boards (2, 2') forming a worktop. In order to facilitate the loading and unloading of the cooking space and, above all, to achieve a safer design for disabled people, the built-in baking and roasting oven (8) is accommodated in a tall cabinet housing (5) which is integrated in the built-in kitchen fitting (1, 1'), which is connected to a lifting device (10), which can be put into operation by triggering a control pulse, for raising or lowering, and which is arranged in its upper position with its lower edge (14) at a height and on a level with a worktop (6) arranged in front of it. <IMAGE>
