Abstract (en)

Aqueous liquid dishwashing detergent compositions are prepared containing from 10% to 50% of an anionic surfactant, from 2% to 20% of a relatively highly ethoxylated draining promoting nonionic surfactant, from 1.5% to 10% of a suds stabilizing nonionic surfactant, and from 20% to 88% water. The compositions exhibit advantages of less filming and spotting for tableware washed in dilute solutions of the compositions after rinsing and drain drying.
