Abstract (en)

[origin: ES8205172A1] The invention relates to a lid upon which a vessel can be fixed. The lid comprises a pouring spout optionally equipped with a valve device and a handle capable of including control means for said valve device. The lid comprises, moreover, means permitting its mutual fitting upon a support element, a position in which it carries said vessel. The lid according to the invention is especially adapted to be employed in a mixing machine used for the homogenization of a product mixture.

Abstract (fr)

L'invention concerne un couvercle (12) destiné à venir se monter sur un élément de support tel qu'une machine d'agitation (16) et sur lequel peut venir se fixer un récipient. Ce couvercle 12 comprend un bec de versement (19) éventuellement équipé d'un dispositif d'obturation (30) et une poignée 18 pouvant comprendre des moyens de commande dudit moyen d'obturation (30). Il comprend en outre deux éléments latéraux 14 destinés à venir s'engager dans deux glissières (4), de formes appropriées, dudit élément de support.
