Abstract (en)
[origin: US4442778A] In a multiple-story tower for the display of merchandise with a plurality of story decks and with between the story decks, spacing supports which can be stuck detachably with their ends into upper and lower receiving shafts at the story decks, it is suggested that with a substantially rectangular outline of the story decks, there be arranged at two opposite sides of the rectangle approximately in the middle thereof respectively one spacing support. It is preferred thereat that the spacing supports be constructed with a groove profile, whereat the concave groove side of spacing supports arranged at opposite rectangular sides of a story deck face one another.
