Abstract (en)
[origin: EP0036103A1] 1. Convertible lifting/film inking system with an ink duct roller (2) arranged on an ink duct, an inking unit roller (5) supplying ink to the ink rollers connected on the outled side, a lifting roller (3) which can be placed on the ink duct roller (1) and which can be swung away from it, the swivel mechanism of which lifting roller can be disconnected in the film operation, and an additional roller (6) with a hard roller surface which, in the film operation, can be placed on the ink duct roller (2) and the inking unit roller (5), characterised in that the lifting roller (3) facing the additional roller (6) is arranged like the additional roller (6) between the ink duct roller (2) and the inking unit roller (5), and in the lifting operation can be swivelled back and forth between these two rollers (2 and 5).
