Abstract (en)
[origin: WO8102692A1] Device for gripping, lifting, transporting and depositing centrifugation drums (8) of centrifuges (1) mechanically loadable and unloadable for deoiling, dehydrating, washing, drying and treating industrial articles. The device comprises a winch (5) two stations at least, carrying a lifting and lowering device (6) having at its output end, a gripping device (7) for gripping the centrifugation drum (8) by its upper edge. To provide for rapid and secure gripping, lifting, transporting and depositing of centrifugation drums (8) of loadable and unloadable centrifuges (1) for deoiling, dehydrating, washing, drying and treating industrial articles, two jaws (11, 12) are capable of rotating about a horizontal axis (16) pivoting to a frame (10) connected to the winch (5). These jaws are arranged facing each other and are movable radially for surrounding partly the drum (8). At least one of the jaws (12) is provided with a rotary drive (14).
