Abstract (en)

Any sounds whatever are transliterated, particularly by a micro- amplifier assembly 2, into modulated electrical signals, available at a source 1 such as a socket connector of known type. A cable 6 connects the source 1 to a modulator 8. The power of a source 5 intended to move a drive element 4 is modulated as a function of the signals received at the input 7 of the modulator 8. <IMAGE>

Abstract (fr)

Des sons quelconques sont transcodés, notamment par un ensemble micro-amplificateur 2 en signaux électriques modulés, disponibles à une source 1 telle qu'une prise femelle du type connu. Un câble 6 relie la source 1 à un modulateur 8. L'énergie d'une source 5 destinée à mouvoir un élément moteur 4 est modulée en fonction des signaux reçus à l'entrée 7 du modulateur 8.
