Abstract (en)  
[origin: WO8100825A1] A laminated article and its method of preparation are described. The article comprises two dissimilar and otherwise chemically unbondable layers of resin materials, one thermosetting and one thermoplastic, which are bonded by use of a coating therebetween consisting essentially of urethane resin. The articles have good cold temperature impact resistance and are especially suited for use as laminated pipe.

Abstract (fr)  
L'article comprend deux couches dissemblables ou ne pouvant etre liees chimiquement de materiaux de resine, l'une thermodurcissable et l'autre thermoplastique, ces couches etant liees en utilisant un enrobage intermediaire consistant essentiellement en resine urethane. Les articles ont une bonne resistance a l'impact thermique a froid et sont specialement appropries pour etre utilises comme tuyau lamine.
