Abstract (en)

A nestable line gripping peg (1) has an elongate body (3) and a pair of arms (2) extending from one end of the body (3), to define an elongate hollow structure having frusto-conical inner and outer surfaces so that it can receive at least the body of a like peg in nesting arrangement. The peg is made of resilient plastics material. The facing edges (5a, 5, 6, 7, 8) of the arms (2) are profiled so as to define a throat (6) intermediate the ends of the arms (2) for retaining the peg (1) on a gripped line.
