Abstract (en)
[origin: EP0037314A1] The present invention deals with (N-substituted carbamoyloxy) alkanoyloxyhydrocarbyl acrylate esters and compositions containing the same and a photoinitiator. <??>The (N-substituted carbamoyloxy) alkanoyloxyhydrocarbyl acrylate esters of the invention are produced by reacting a hydroyalkyl acrylate with a lactone monomer and capping the resulting adduct with an isocyanate. <??>The resulting product is useful in ink, paint or adhesive formulations curable by thermal or radiation means. <??>The (N-substituted carbamoyloxy) alkanoyloxyhydrocarbyl acrylate esters have the formula <CHEM> wherein R is an unsubstituted or substituted (i) linear or branched alkyl group having from 1 to 4 carbon atoms or (ii) aryl, alkaryl or aralkyl group having 6 or 10 ring carbon atoms or (iii) cycloalkyl group having from 5 to 8 ring carbon atoms when x is 1 and polyvalent alkylene, arylene, alkarylene, aralkylene or cycloalkylene having carbon atom values defined for (i) to (iii) supra and a valence equal to the value of x when x is greater thqan 1; wherein the substituents on the R group are not reactive with the isocyanato radical; R min is hydrogen or alkyl or alkoxy having from 1 to 4 carbon atoms; R sec is a linear or branched divalent alkylene of 1 to 10 carbon atoms, divalent cycloalkylene of 5 to 12 ring carbon atoms or divalent arylene of 6 to 10 ring carbon atoms; X is hydrogen, methyl or cyano; x has a value of from 1 to 4; y has an average value of from 1 to 20; and z has a value of from 3 to 10.
