Abstract (en)

[origin: EP0037606A1] 1. Connecting element for transmitting tension from a tightening nut (13) to a structural element (11) or to several structural elements (11) arranged side by side, characterized in that it consists of a length of tubing of rectangular cross-section, this length when viewed from one of the longitudinal sides (1, 2) having the shape of an isosceles trapezoid, and the transverse walls (3, 4) disposed at right angles to this longitudinal side (1, 2) each having a central hole (5, 6) for the passage of a tie rod (12).
