Abstract (en)
A microwave cooker having two adjacent cookers (3,5). A source of microwave energy is mounted in a wave guide (15) having two branches (19,21) each connecting with an oven so as to direct microwave energy thereto. A deflector means (29) is provided to selectively block one or other of the branches so as to direct radiation to the other oven. One of the ovens also has a heating element thereby enabling the oven to be heated by the element and/or microwave energy directed thereto
