Abstract (en)

1. Sink bowl having lateral walls provided with flanges extending at least along two opposite portions, characterized in that the flanges (2) have a width and are located so as to be capable of supporting a basket or an utensil and so as to form in the bottom of the bowl a small lower compartment (3) having a drain aperture (5) in its bottom, the distance between said flanges (2) and the bottom of said lower compartment being such that when sewage is being discharged, it never comes into contact with the said basket or utensil.

Abstract (fr)

Une cuvette de décharge formée avec un rebord (2) sur au moins deux côtés opposés, les rebords se prolongeant vers le fond de la cuvette pour former un compartiment inférieur (3) dans le fond duquel est ménagé l'orifice de décharge (5). La cuvette peut être munie d'un couvercle (11) pivotant ou amovible. Un couvercle supérieur (13) formant plan égouttoir incliné peut également être prévu.
