Abstract (en)

[origin: EP0039032A2] The perfuming agents with a fruity or flowery note conform to the formula (I) <IMAGE> where R<1> and R<2> are each independently of the other hydrogen, lower alkyl, (C1-6) or form a heterocyclic ring together with the nitrogen atom. The perfuming agent compositions contain 1-50% by weight of the compounds, preferably the N,N-dimethyl- and -diethyl-substituted 3,5,5-trimethylhexanoamide.
