Abstract (en)
[origin: EP0039384A2] 1. Lost sheathing for ring beams, ceiling edges and/or lintels, with metal clips (2, 13, 22) having at least two substantially mutually perpendicular portions (5, 6; 14, 16; 23, 25) and multi-layer plates (1, 1a) which have an outer plaster-carrying layer and at least one heat barrier layer and mutually spaced bores (11) which are normal to their support surface and which are of such a size that the respective one portion (6, 14, 23 or 24) of one of the metal clips (2, 13, 22) can be completely inserted, characterised in that, in the region of the bores (11), on their support surface, the multi-layer plates (1, 1a) have recesses (12) which have the height of the thickness of the metal clips and which communicate with the bores (11), and that a respective other portion (5, 15, 25) of the metal clips has a means (7, 3; 17, 18; 26, 21) for securing said portion to a support.
