Abstract (en)

A machine for packaging pieces such as tiles or bricks in general comprises an improved apparatus for tying up with wire already formed packs of said pieces. Said apparatus consists of means carrying out the feeding, the cutting and the positioning of a wire length - underneath the pack to be tied up und while the pack itself is being fed above - on two arms for winding said wire length around said pack, and it provides to wind said wire length around said pack through simultaneous rotation of said arms, immediately after the pack has been fed.
