Abstract (en)

[origin: US4391400A] A looper device of the horizontal type for forming a loop of strip for storage and intended to be used in a strip material processing line. Rollers for separating the upper strip from the lower strip of a loop formed by a moving cart are stored on the cart and are successively placed in position onto and removed from two cooperating stationary frames by a device mounted on the frames and which device is activated by a cam track located on the sides of the cart.

Abstract (fr)

Dispositif de formation de boucle d'accumulation ou de réserve destiné à équiper une ligne de traitement de matériau en bande. Les rouleaux séparateurs supérieurs (8, 9, 10) sont stockés sur le chariot de stockage (1) et sont mis en place successivement sur la charpente à l'aide de dispositifs automatiques (14) de pose et de dépose.
