Abstract (en)
[origin: WO8101584A1] The construction element (1a) has a bridge-like portion (2) of which a first (5) and a second (7) pillars are provided on the lower part thereof with a plurality of steps (6). The second pillar (7) is connected by an inclined part (8) to a channel-like portion (3), provided with an outer edge (9). During construction of the staircase, a second element (1b) is set in place with one of the steps (6) of the first pillar on one arris (10) of the stair (4), as well as with a step corresponding to the second pillar on the arris (11) on the top outer edge (9) of the first element (1a). The height of the stair may be varied up to a double ratio according to the steps (6) in contact with the arrises.
