Abstract (en)

[origin: WO8101504A1] Portable type instruments, allowing the preparation of an unlimited number of recipies and the control of utilization or consumption of different volumes or compositions, easily, rapidly, with precision and without any particular knowledge. This device comprises a transparent container (5) provided with support means (6) for holding cards (7) made of plastic, cardboard, rhodoid the like. The container (5) having a cylindrical (5) shape (8) or the like, has an inner wall formed by plane vertical facets (11), defining the configuration of a magnifying glass, improving the vision and definition of the levels. The existing angles between the planes of the facets facilitate the homogeneity of the mixture. Among the most interesting application, is the preparation of recipies: pasteries, beverages, liquids; pharmaceutical compositions, food for the sick; etc...

Abstract (fr)

Les instruments du type portatif, permettant l'elaboration d'un nombre illimite de recettes et le controle d'utilisation ou de consommation de volumes ou compositions differentes, facilement, rapidement, avec pre et sans connaissances particulieres. Ce dispositif comprend un recipient transparent (5) muni de moyens de maintien (6) de fiches (7) en plastique, rodoid carton ou autre. Le recipient (5) de forme exterieure cylindrique (8) ou autre, presente une paroi interieure formee de facettes verticales planes (11), constituant la configuration d'une loupe, ameliorant la visibilite et la definition des niveaux. Les angles existants entre les plans des facettes facilitent l'homogeneite du melange. Parmi les applications les plus interessantes de l'invention, on peut citer l'elaboration de recettes: patisseries, boissons, liquides; formules pharmaceutiques, controle d'alimentation de malades; etc.
